About Me

Creative and results-driven Web Developer with 10+ years of experience in WordPress development, custom plugin engineering, PHP, JavaScript, and full-stack web solutions. Specialized in building scalable, high-performance, and user-friendly digital platforms tailored to client needs worldwide. Experienced in custom API integrations, AI-powered automation, performance optimization, debugging, and developing secure, modern web applications. Skilled at transforming complex business requirements into efficient, innovative, and conversion-focused solutions while maintaining clean code, responsive design, and seamless user experiences.

Professional Experience

- Senior WordPress & API Developer**
PilarGlobal (Finland) 2023 - 2026
Develop and maintain custom WordPress solutions, plugins, and scalable web applications. Collaborate with clients and teams to optimize performance, improve security, and integrate AI-powered automation features.
- Lead Web Developer**
Ready to Run Designs (USA) 2021 - 2023
Delivered custom websites and full-stack web solutions for international clients. Specialized in WordPress development, API integration, performance optimization, bug fixing, and responsive UI/UX implementation.
- Senior Web Developer**
Monkeys at Work (Canada) 2019-2021
Developed and maintained modern websites, custom themes, and plugins while improving site speed, responsiveness, and overall user experience for multiple client projects.
- Web Design & Development**
AM2AM 2015- 2018
Designed and developed responsive websites, handled front-end and back-end customization, and provided long-term maintenance, troubleshooting, and technical support for clients.

Professional Plugin and Products

- Penneo-API-Signed-Document-Integration**
<https://github.com/mdkamrulislam0093/Penneo-API-Signed-Document-Integration>
Built a secure API integration with Penneo to automate signed document handling using event-driven workflows. The system detects signing completion, retrieves finalized documents, and supports automated user delivery via email or confirmation pages.
- Addoncraft Repeater For Elementor ACF**
<https://wordpress.org/plugins/addoncraft-repeater-for-elementor-acf/>
Addoncraft Repeater for Elementor ACF allows you to easily display Advanced Custom Fields (ACF) Repeater fields inside Elementor, including a dedicated Slider widget for carousel-style layouts.
- Product Try-On & Live Preview By AI**
<https://github.com/mdkamrulislam0093/AI-Product-generated-image>
Developed an interactive AI-powered product try-on application that allows users to preview products in real time before purchase. Built responsive live visualization features to improve user experience, engagement, and online shopping confidence.

Professional Plugin and Products

Stallion Express Shipping & Tracking Integration

<https://github.com/mdkamrulislam0093/Stallion-Express-Shipping-Tracking>

Developed a custom shipping and tracking integration for Stallion Express to automate order shipment management, tracking updates, and delivery workflows within eCommerce platforms.

Select Enhancer for Elementor Forms with Select2

<https://wordpress.org/plugins/select-enhancer-for-elementor-forms-with-select2/>

Select Enhancer for Elementor Forms with Select2 upgrades default Elementor Pro form select fields into powerful, user-friendly dropdowns using Select2.

CARFAX Vehicle Data Integration

<https://github.com/mdkamrulislam0093/Carfax-Integration->

Integrated the CARFAX API to retrieve and display vehicle history, reports, and automotive data within web applications, improving user access to real-time vehicle information and reporting workflows.

Education

bachelor of Science

National University Of Bangladesh

2014 – 2018

Complex Projects

Noste IO

<https://baton.noste.io/>

Built a full-featured document management platform for Noste.io with automated approval workflows, activity tracking, dynamic form generation, document preview, and PDF download functionality, streamlining internal document handling and collaboration processes.

Loikkakopla

<https://loikkakopla.fi/>

Developed a custom gamification and user management system for Loikkakopla, including point tracking, leaderboard rankings, badge rewards, profile management, and a custom plugin-based content management system to enhance user engagement and learning experience.

Compliant101

<https://common.compliant101.co.uk/>

Developed a custom WordPress-based compliance and workforce management system for Compliant 101 using PHP (OOP), JavaScript, jQuery, AJAX, and MySQL. Built automated safety and settled-status verification workflows, integrated government API for skills card validation, and implemented a scalable plugin architecture for real-time compliance tracking.

Technical Skills

Languages

- *Advanced PHP & PHP OOP*
- *Javascript, JQuery*
